System on Chip Signage Application

Web-based Digital Signage with an Android based computing device. Dynamic interactive signage has never been easier with its online Content Management System. Upload your content and create sequences and channels that can easily be assigned to players across the globe.

The versatile design allows you to:

- + Create interactive presentations with a single click
- + Use asset tags and GPS location to distribute specific content to specific players
- + Choose from different display templates in both portrait and landscape mode
- + Display live data such as RSS feeds and other websites
- + Make use of QR codes to display content you want on smart phones and tablets
- + Analyse click rates and impressions and/or bill advertisers based on these figures

Web-Based Content Management System

Set-up and installation are made easy with the included web based content management system. This preconfigured system enables you to use rich media content to create an entirely personalised channel to suit your brand style.

Follow these two easy steps to create the ideal channel:

1 Upload Your Media Files

Upload your logos, images, video files, flash files and other relevant content to the media server.

2 Schedule Your Content

The options for creating your own channel are endless. Combine elements and pages from your narrowcast into a central scheduling system. Predetermine which content will be shown at which precise time.

3 Plug & Play

Feature		Freescale ARM Cortex™ i.MX53 1 GHz processor			
Kernel		<ul style="list-style-type: none"> i.MX53 1 GHz 1 GB DDR3 Memory EMMC 4G 			
Display	HDMI Connector	x1			
	Type	Freescale SGL5000 Audio Codec			
Audio	Channels	Stereo/5.1 CH with HDMI
